### smellBgone Infill

Odours in synthetic grass and other surfaces are the result of two factors:

- ammonia in the urine of animals
- the bacterial growth which occurs

**smellBgone infill** is the product of an organic group of minerals that are hydrated calcium potassium sodium aluminosilicates in which water and Urine, is held.

**smellBgone infill** absorbs the ammonia, eliminating bad odours.

smellBgone should give you many years of odour free synthetic grass, however in extreme cases or if not applied correctly you may need to re-apply.

## HOW TO USE

- **smellBgone infill** should be spread evenly over the affected area.
- See recommended rates chart for quantities.
- Using a stiff bristled hand broom or a power broom work the product into the turf.
- The product can be applied during the initial installation of the synthetic grass or post installation as an odour problem arises.
- smellBgone is safe for humans and pets, however it is recommended you use a dust mask to prevent inhalation of any dust particles.
- Protective clothing and gloves are recommended.
